Case study - ICE

CENTRAL PROCESSING UNIT

REQUIREMENT

Central Processing Unit for ICE High Speed Train (Doors, Climate, etc.).

Subrack's front rail should be suit to UBK handle (de facto standard handle) for plug-in units used in Railway application in Japan.

Customer requested a mixed application (3U and 6U boards) assembled into one subrack. The support bars on the side panel, the removable threaded inserts, the Center PIN at the rear side and the option to assembly the flowting connectors was also requested. EM protection was a must.
