

# Varistar Server And Networking Cabinet

**SCHROFF**

## ADVANCEMENT OF ESTABLISHED PRODUCT PORTFOLIO

The more complex and demanding the conditions of your IT infrastructure, the more you ask from an individually adjustable server or networking cabinet.

With its wide SCHROFF Varistar product portfolio, nVent lets you build the solution that is best for you from the range of components and covers available. The SCHROFF Varistar platform offers more than 1000 different electronic and mechanical components, all of which can be supplied mounted and tested.

Should you need other dimensions, special accessories and additional detachable parts, the SCHROFF Varistar server and networking cabinets can be adjusted to all needs of your data center.

With its outstanding characteristics, the SCHROFF Varistar platform will satisfy even the most complex requirements on loading capacity, cable management, security, thermal limits and energy efficiency.

### **ADVANTAGES AND BENEFITS OF SCHROFF VARISTAR SERVER AND NETWORKING CABINET**

- Platform with a wide range of standard dimensions up to 52RU
- Tested and approved loading capacity of 1600 kg
- Unique frame profile for a flexible and secure mounting of accessories and cable management
- Sophisticated cover concept providing efficient ventilation in the cabinet
- Three standard colours: black, grey and white
- Configurations despatched in 10 days lead time
- Clever infrastructure solutions and product combinations
- Modular standard components offer price advantages
- Minimal planning outlay, short setup time
- Easy to adapt to your requirements thanks to the standard product portfolio

- Depth-adjustable 19" plane
- Static loading capacity of 1600 kg

- Covers for different recessed 19" planes provide for ideal ventilation
- Air baffles to separate cold from warm air

- Openings with brush strips for cable management
- Optional cable fingers help to structure large amounts of cables

- SCHROFF socket strips (and also those from different manufacturers) can be fitted individually or next to each other inside of the cabinet
- The frame meander type profile supports the cabling in different parts of the cabinets
