December 10, 2020

The details in this manual have been carefully compiled and checked.

The company cannot accept any liability for errors or misprints. The company reserves the right to amendments of technical specifications due to further development and improvement of products.

Guardian Management Gateway user documentation applicable to this release

The *Guardian Management Gateway User Guide* and the *Guardian Management Gateway Command Line Interface Specification* document from the 63998-20553 (1.0.10) release remains applicable for this release.

New and changed features since release 63998-20553 (1.0.10)

1. This release includes updates to the Linux distribution that includes the following specific change:

   - Support for KIOXIA (formerly Toshiba) TH58NVG2S3H Flash device has been added to U-boot.

2. The **rupgrade** utility has been updated with a check for U-boot compatibility before allowing an upgrade to proceed. If the NAND Flash type is not Cypress/Spansion and the U-boot version is lower than 0.19, the upgrade will fail, even if forced.
