# **Detail of Actuating Surfaces**

Required on Top and Bottom guide plates

Provides insertion and extraction travel of 8.9 (.35) min.

Nominal position of card edge when seated in connector. The inserter-extractor can move the board an additional 1.3 (.050) if necessary due to the tolerances of the assembly

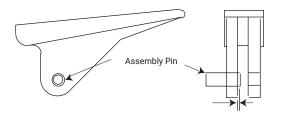

### **ASSEMBLY PIN**

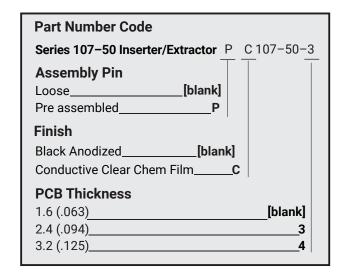

Option to be pre-started for:

- · Faster and easier installation of the extractor to the PCB
- Eliminates the need for special tools or equipment and set up time
- · Eliminates loss of loose assembly pins

If the "P" option is not selected, the extractors and the pins will be packaged seperately.

2.38 (.094) dia x 6.35 (.250) long Pin protrusion of approximately .38 (.015) seeks hole in PCB

### Part Number Code example: PC107-50-3

Series 107–50 extractor, with pre-started assembly pin, conductive clear chem film finish, for PCB thickness of 2.4 (.094)
