

**DFARS 252.225-7009  
RESTRICTION ON ACQUISITION OF CERTAIN  
ARTICLES CONTAINING SPECIALTY METALS**

Schroff products can support the needs of Prime Contractors and Subcontractors supplying product to the DOD, particularly the Preference for Domestic Specialty Metals Clause. This clause is applicable to DOD Prime Contract Awards exceeding the simplified acquisition threshold, of products, components and assemblies for use in Aircraft, Missile and Space Systems, Ships, Tank and Automotive Items, Weapon Systems or Ammunition.

For the Schroff product line, this affects the hardware, components and materials that are made of stainless steel. For customers requiring DFARS specialty metals component, please contact your customer service representative to confirm the DFARS specialty metals part number for your component. Generally a SM suffix will be added to the base part number to signify compliance to DFARs.

We recognize that each of our customers has a different method for handling this requirement, so we have implemented a process that we feel will handle the majority of our customers' requirements. At this time the Class Deviations are not retro-active so we require that all quotations and purchase orders note this requirement along with the Prime Contract Number.

**DSCC  
DEFENSE SUPPLY CENTER - COLUMBUS**

Schroff also provides as a standard offering products that meet many of the specifications defined by Defense Supply Center – Columbus.

DSCC components are offered as a standard product, numbered by the DSCC part numbers and either a 'CM-' prefix for legacy Calmark component, or a 'BR-' prefix for legacy Birtcher components.

DSCC components must be ordered using the DSCC part number to guarantee the part will contain the proper specifications. All part numbers defined in the DSCC specifications are considered COTS items for Schroff.
