

## PIU WITH CPCI IEL

### REQUIREMENT

Modified PIU for a compactPCI serial application. U-shaped front panel with CompactPCI handle and some custom specific cut outs and printing.

### CHALLENGE

Assembly of all components of the PCB. Colour of the customer logo (not displayed in the image).

### SOLUTION

Modification of the U-shaped front panel, custom specific cut-outs and printing. Assembly of the PCB holder (top) and handle (bottom) so the customer can easily assemble his specific board. Assembly of a micro switch on the handle. Preassembly of the textil (over foam) gasket on the right hand side.

### Project Details

Location	Germany
Type of system	Electronic application (Test & Measurement)
Technology	CompactPCI Serial application
Product scope	Series
Date/Time frame	02 / 2015
Contract scope	> 30 PIU per order
