CONNECT AND PROTECT

DFARS 252.225-7014 & ALT 1. PREFERENCE FOR DOMESTIC SPECIALTY METALS CLAUSE

nVent SCHROFF products can support the needs of Prime Contractors and Subcontractors supplying product to the DOD, particularly the Preference for Domestic Specialty Metals Clause. This clause is applicable to DOD Prime Contract Awards exceeding the simplified acquisition threshold, of products, components and assemblies for use in Aircraft, Missile and Space Systems, Ships, Tank and Automotive Items, Weapon Systems or Ammunition. For the Schroff product line, this affects the hardware, components and materials that are made of stainless steel. At the time of this writing, all COTS items which include all part numbers configurable in this catalog are exempt from the Preference for Domestic Specialty Metals Clause for Prime Contract Awards after October 25, 2007. Fastener DNAD waivers are also available for Prime Contract Awards between April 10, 2007, and July 26, 2008. There are many other exemptions available.

We recognize that each of our customers has a different method for handling this requirement, so we have implemented a process that we feel will handle the great majority of our customers' requirements. Because at this time, the Class Deviations are not retro-active, in order to

best respond to your needs, we do require that all quotations and purchase orders note this requirement along with the Prime Contract Number. We do charge for a signed DFARS 252.225-7014 & Alt 1. Statement Sheet that must go along with your order. For those customers that can use the COTS exemption, we offer free of charge documents that you can download from our website. The Product Sheets will indicate from the Statement Sheet which statement applies for your product of interest. If these documents meet your needs, please indicate this in your quotation or P.O. Of course, for those customers that need a signed Statement Sheet, we can also accommodate this requirement at an additional fee.

DSCC - DEFENSE SUPPLY CENTER - COLUMBUS

nVent SCHROFF also provides as a standard offering products that meet many of the specifications defined by Defense Supply Center – Columbus. nVent SCHROFF has incorporated the DSCC part numbers as a standard product offering to get the proper specification requirements by the addition of a "CM-" prefix to the DSCC part configuration for our internal part number system. The DSCC part number will be part of the description. All part numbers defined in the DSCC specifications are considered COTS items for nVent SCHROFF.
