

INDUSTRIAL AUTOMATION

REQUIREMENT

Companies which are using 19" components and must assemble them onto a mounting plate of a cabinet. No option for cabling from the rear side.

CHALLENGE

How to connect the assembled backplane or power supply if such a subrack is assembled to the mounting plate. The quantity of piece parts which build the subrack have to be stripped down to receive an attractive price.

SOLUTION

Customer still needs for the control of his industrial application some 19" based PCB's and boards. Customer can still use standard accessories and the side panel includes the fixing option to the mounting plate of the wall mount case or cabinet.

Project Details

Location	Europe
Type of system	Subrack for industrial use
Technology	EuropacPRO
Product scope	Easy to assemble to a mounting plate of cabinet or wall mount cases
Date/Time frame	2013 -
Contract scope	-
