

TEST & MEASUREMENT

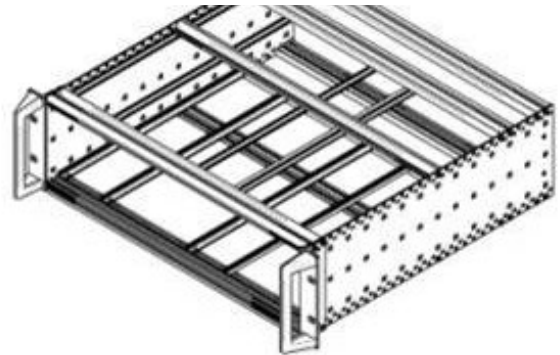

REQUIREMENT

Companies using 19" subracks plus handles which give the opportunity to screw the subrack easily into a cabinet. Aluminium guide rails requested. Furthermore slide rail to support the deep and heavy subrack can be used.

CHALLENGE

Use the existing piece parts from our subrack platform to receive an custom oriented price for the solution. Long and heavy PCB's must be supported by aluminium guide rails to avoid a bending in the depth.

SOLUTION

Customer can easily screw the subrack due to the use of the rugged standard handle. The heavy and very long PCB's are supported by aluminium guide rails. The subrack itself can be used with standard slide rails into the cabinet und make the assembly easy.

Project Details

Location	Europe
Type of system	19" Subrack for test & measurement use
Technology	EuropacPRO
Product scope	19" subrack with rugged handles
Date/Time frame	2015 -
