

## MULTICHANNEL AUDIO RECEIVER

### REQUIREMENT

Customer needs a replacement product for his new series. Additional cooling was required and the assembly of guide rails and of a backplane. Custom specific modified rear and front panels. Ratiopac PRO Air builds the base for this application.

### CHALLENGE

In this case, Ratiopac PRO has a special depth according to customer's requirement. Furthermore the additional advanced cooling capability was required. The design is highly customized with individual color and cut-outs. The case has been completely assembled and completely wired for the customer.

### SOLUTION

Integration of components was a must.
